We will start with the following concepts

- 1) Syntax of Arrow functions

Let's look at a new and cool way of defining functions in JS

Let me show you in code

Syntax looks cool, but why did we learn it?

- 1) Arrow functions change the way lexical binding works in Javascript
- 2) You will learn more about lexical binding or **this** keyword in coming levels
- 3) From now on, try and use arrow functions only unless instructed otherwise.

The next steps are ...

- Default parameters
