

# JS - the Journey forward

- Aditya Kumar  
Chief Technology Officer, [edvisor.com](https://edvisor.com)

# **This was just a beginning, There is a lot to learn!**

- 1) Manipulating a very large piece of complex information
- 2) Exploring more about arrays and object and playing with JSON
- 3) Advanced Js concepts like closures and scope
- 4) Utility functions
- 5) Asynchronous programming
- 6) Programming practices - Good and Bad

## More to come in JS journey

- 1) ES6
- 2) Typescript
