

Design Basics - Github Pages

- Aditya Kumar
Chief Technology Officer, edwisor.com

We will cover with the following concepts

- 1) What is Github Pages service?
- 2) How to host your application using Github pages?

Github Pages lets you host your repository

- Using github pages, you can just create a repository, push your code to it and you will get a URL where that website is live.
- [Checkout the official page](#)

Let me try and make the website that I just created, live on Web!

- Let's follow the process written there one by one.

Next Steps -

- 1) Design - Advance Level
